SUMMARY

A technology enthusiast with a strong interest in IT and web development. Began my journey by completing a degree in Agricultural Technology with hands-on experience in automation and instrumentation. Decided to switch careers from agricultural technology to IT to pursue my passion for web programming and technology. Eager to deepen my skills in web and mobile application development. To strengthen my skills, I enrolled in a coding bootcamp, where I built projects using modern technologies and frameworks. I am eager to continue learning and contribute to impactful projects in software development. Open to opportunities both in Jakarta (willing to relocate) and remote positions.
